

Introducing the senseFly eBee X with Agisoft Metashape for high-precision data acquisition and processing

Cheseaux-sur-Lausanne, Switzerland, July 25, 2019 – senseFly, the global leader in fixed-wing drones, today announces a new limited-time offer which combines the senseFly eBee X—and its highly precise suite of cameras— with intelligent photogrammetry software from Agisoft Metashape.

From today until September 30, 2019, customers who purchase an eBee X with one of the following sensors (senseFly S.O.D.A. 3D, senseFly Aeria X or MicaSense RedEdge-MX) will receive 1,000 (USD/CHF/EUR) off the price of the drone and a six-month Agisoft Metashape Professional license for free.*

Combined, this solution provides users with fully integrated and highly precise suite of cameras as well as powerful software that enables the generation of high-quality point clouds, orthomosaics and digital elevation models —all while reducing operation time and costs for end-users.

“senseFly is at the centre of the growing fixed-wing drone market, and we continue to lead the way by building technological and commercial partnerships with the most important players,” said senseFly CEO Gilles Labossière. “With this new offer, customers get access to our leading fixed-wing drone technology and Agisoft’s intelligent photogrammetry software in one convenient package.”

“We’re very excited to be a part of this special offer,” said Dmitry Semyonov, Agisoft CEO. “Whether you need it for photogrammetric processing of digital images or to generate 3D spatial data, Agisoft Metashape is fast and flexible software designed to produce quality and accurate results.”

The senseFly eBee X and Agisoft bundle is an intelligent new way to map. Users will enjoy a seamless integration with senseFly’s popular eMotion flight-planning software and Agisoft Metashape, which provides exceptional flexibility and performance and allows them to take advantage of key Agisoft features, such as the ability to process 450 images (80ha at 2.5 cm/pixel RGB) in 1.5 hours, produce high-quality point clouds and quick DSM and orthomosaics.

The senseFly eBee X with Agisoft Metashape software is available for purchase now via [senseFly distribution partners](#).

**Offer ends September 30, 2019, or while supplies last, whichever comes first.*
